Personal Projects

NewsApp

The main focus of this application is to connect news articles from all around the world and deliver it to user as fast as possible in best visualize way.
Description: News will be displayed in short format with title, image and little description in list view. It will help user to access required news faster. News API has been used for collecting different news sources at one spot. On sending request it will give response in JSON format which contains source id, title, description, image URL, article URL, author, time etc. We need to handle and parse this JSON into string format which is our required format.
Technologies: React.Js , Restful API .
GIT: https://github.com/Nidhi9804/NewsApp

NotesApp

Build a Notes App where you can add , delete ,update and modify your notes on one click . Create checklists. Make a grocery list, a wish list, or a to-do list, then tap to check off items as you go.
Technologies: React.Js , Restful API .
GIT: https://github.com/Nidhi9804/NotesApp
